HUMBER COLLEGE OF APPLIED ARTS AND TECHNOLOGY

Expansion should be finished by 1980

Students can be expected to have locating problems and alphabet trauma over the next few years with the addition of three new buildings on Humber's north campus containing M, N, and Q. Section Q, solely a theatre area, will embrace two stories and will

can be made, dressing rooms and walkarounds for audiences to view the main auditorium.

The Instructional Materials Centre (IMC) will occupy the basement of section M and part of the first level along with the Royal Bank and the book store. Section N at the basement level will hold receiving and book storage. Levels one and two of section N will house the Centre for Continuous Learning.

The offices of the president, vice-president, executive dean, personnel and physical resources will enhance level two of section M. The library nearby will be served by a circular staircase which will wind up to the third level.

Finally, level three of sections M and N will provide space for another library along with seminar and class rooms.

Relocation of the library will allow the computer staff to breathe easier in the vacated space. Remaining area in the library — (the area above the Humberger) will provide room for another lounge. Whether it will be for teachers or students is still to be decided.

A library feature will be the availability of audio-visual tapes, a set-up similar to the manner in which records are listened to in the library now.

Democracy and music will appropriately mix in section D, now the reception area, where the Student Union and the music department will eventually make their permanent headquarters.

Ceilings on education spending significantly slowed down progress of Humber's completion said Mr. Kielman, Director of Campus Planning. He said it had been hoped construction would start this fall but as it is, Mitchell Construction Ltd. may not get the "go ahead" until the spring of '74. The three buildings under discussion now may be completed by 1976 and complete Humber expansion may not be seen until the early 1980's.

Spending ceilings also account for the stucco finish and painted brick work around Humber which is less expensive than other finishings being offered. Humber allows \$25 to \$30 per square foot when considering construction costs whereas, said Mr. Kielman, other institutions may double that.

Buses to run more efficiently

By Marian McEwen

Although Humber is trying to synchronise eight buses over 14 different routes, Student Affairs Co-ordinator Laurie Sleith promises that service will be more efficient this year.

Some buses have been rerouted to include a new service to Malton. Another innovation is the use of express buses to and from the subway.

Humber has been able to buy three new buses and hopes to acquire more if funds permit but students will still be faced with crowded conditions because students a larger number of who are travelling in this manner.

HUMBER COLLEGE OF APPLIED ARTS AND TECHNOLOGY

Ice arena goes bust

The administration of Humber College has suffered a slight setback in its plans to build a dual surface ice arena by the fall of 1975. The Borough of Etobicoke has backed out of the cost sharing arrangement with the College to finance the arena. With the Borough goes \$500,000.

The ice rink was number three in a list of three choices of Capital Building projects. Last spring's survey co-ordinated by student Services asked students which non-academic capital projects they would like to support. The rink was behind a Student Centre, and an Athletic and Recreational Fieldhouse. Now that plans for the rink have been shelved one would assume the College would proceed with one of the other choices. However, we may be getting a Fine Arts Centre.

If the College should go ahead with this project we hope Mr. Wragg doesn't come knocking on students doors looking for fund-raisers and supporters.

The Administration has proved once again that its priorities rank above the students. We hope another 'token student survey' will not be sent in the mails, since our opinions are disregarded in the end.

Let the Administration find its fund-raisers withing its own confines, until the realization that a Student Centre is top priority finally hits home.

St. Vincent

Support continues

By Mary Kelly
For the fifth consecutive year, the staff and students of Humber College are sponsoring thirteen students in scholarship programs from the Island of St. Vincent in the West Indies.

According to Doris Talon, Assistant to the President, the program has been in existence since 1968. She said the students' air fare to Canada, as well as tuition, books and accommodations will be paid for by the College. Furthermore, Ms. Talon said, the program has been very successful and half the graduates have completed their courses with honours.

The students this year are enrolled in Civil Technology, Hotel Administration, Medical Secretary, Business Administration, Drafting, Architecture and Accounting. The students were previously enrolled in the British system of education which is similar to ours.

The students have only been in Canada two weeks and some of them have found the climate too

humid and the people less friendly than in the islands. However, they are looking forward to the first snow.

Leadership and executives club to form at College

By Brian Kendall
Steps are being taken to form a chapter of Toastmasters International at Humber.

Toastmasters is an organization designed to provide its members with the opportunity to develop their leadership and executive potential over dinner. A non-profit organization, Toastmasters utilizes guest speakers to entertain as well as inform club members. According to John Liphardt, business division chairman, Humber is ripe for this type of club. "We have the facilities and the food is good."

He said Toastmasters would provide Humber grads with an excellent opportunity to continue their association with the College as well as being valuable to present students and the public.

Bike club revived in Borough

By Patti Vipond
Racers, gliders and ecology-minded people are invited to join Eto Bike O, Etobicoke's new cycling club.

"There are no fees to pay, any type of bike is welcome, and riders can bring all the friends they want," said Don Dicks a Business student at Humber College.

Mr. Dicks and co-founders Karen Caspell, and Barb and Garry Kirky, revived the club in June after it had been abandoned by the Borough of Etobicoke. Advertising on local radio and cable T.V. stations, plus high school campaigns run by Karen Cosell have brought the club 170 members so far.

Long distance, short distance and Sunday family tours have been created to meet all cycling levels. Long distance rides go about 60 miles, leaving from Richview Collegiate at Eglinton and Islington, and go out of Toronto. The next tour on September 16 will go to Oshawa.

Medium rides include a variety of terrain and cover more than 10 miles.

Easy tours are those covering less than 10 miles return. Sunday morning family tours offer relaxed riding of eight to 10 miles. The next family tour will be September 16, starting at Richview Collegiate and go to the bike paths of North York.

Following the monthly meetings of Eto Bike O, a newsletter is sent out which discusses everything "from the care of your tires to the height of your handlebars." Anyone interested in receiving the newsletter, or writing for it can put in their names at the next meeting to be held at Bloordale Community school, September 12, at 7:30 p.m.

Workshops will be run all winter by the Centennial Cycle Shop to teach club members how to repair their own bikes. Members will be notified of the workshop locations in coming newsletters.

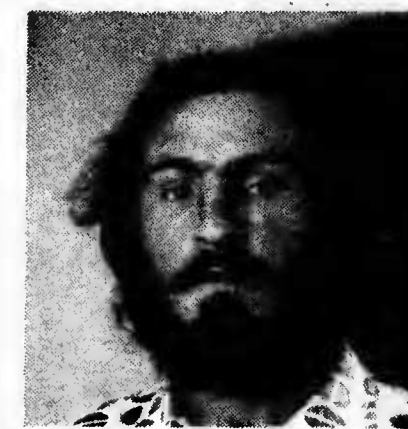

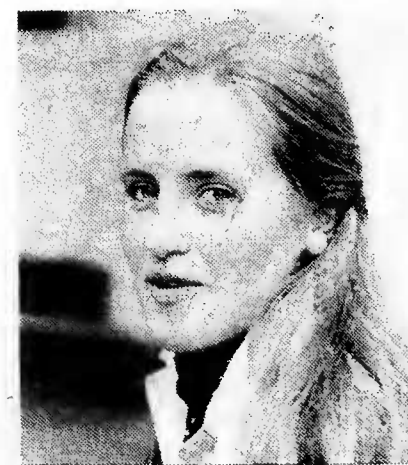

Both Sides Now

"Do you think College sports are relevant to the school?"

Borys Lenko, 3rd year Journalism —
"I think they're irrelevant. If people want to get exercise, they can get it outside. College sports should be left in high school."

Marcella Deangelis, 1st year Travel and Tourism —
"Yes. It is definitely important for the school's reputation for people to go to games. I'm all for it."

Frank Sciara, 2nd year General Business —
"Not really. Have you ever heard them (athletes) talking? Most of those guys are out for the glory."

Irene Nagorski, 1st year Accounting —
"Yes. You can go to school and learn but you must get exercise. It's nice to go out and cheer for the school team."

Housing: prospects don't look promising

By Nancy Abbott

Although Humber College students haven't been pairing off two to a bed — at least in most cases — empty beds are not overly abundant.

According to Laurie Sleith, head of student housing, "things are tight" as far as housing is concerned.

He said more students will be seeking a place to live because there are more students enrolled in the College, while the number of

houses available are not plentiful.

The housing office will try to place as many students as possible he said.

Mr. Sleith said the office gives each student a list of ten or more houses to suit his pocketbook, tastes and needs.

"Each student is an individual as far as his needs are concerned," he said. Humber finds people to provide rooms by placing advertisements in such local papers as the Etobicoke Advertiser

Guardian and radio stations such as CHUM-FM.

He added most landlords of apartment buildings are not willing to register with a student housing project because the students don't stay long enough.

"Right through the year we have students looking for a place to stay," Mr. Sleith said. "They have all different reasons for leaving one place to go to another."

York University now offers Humber College students a place to live.

Brenda Smallman, office manager of the Student Union, has left her position to enter the Journalism course and become Advertising Manager for Coven.

Her replacement is Deborah Featherstone, whose duties include the management of most of the SU financial matters, bookkeeping and secretary receptionist.

More good news from OSAP

For students under 24 and unmarried who have:

- 3 or 4 years of successful post-secondary education
- 3 or 4 years of labour force experience
- or a 3 or 4 year combination of the above

As modified Group A OSAP applicants, an additional \$5,000 (3-year combination) or \$6,000 (4-year combination) will be deducted from your parents' gross income in assessing your eligibility for financial assistance.

Students seeking OSAP aid for the full academic year must apply before September 30. Your Student Awards Officer has the details.

Crowds at the Pipe force end to lunch playing poker

By Tom Green

Overcrowding in the Pipe has forced Dave Davis, Director of Food Services, to re-examine the lunch scheduling for the students and to forbid card playing in the Pipe during peak periods.

Mr. Davis called the lineups between 12:00 p.m. and 1:15 p.m. as "mind boggling". He said the flow of almost 1,200 students per hour is the problem and that the students are going to have to schedule themselves for the amount of time they spend in the cafeteria.

To help offset this problem Mr. Davis will soon be opening a booth selling sandwiches, coffee and milk exclusively in the Concourse. Mr. Davis will also be opening the Seventh Semester this week and serve an all-inclusive \$1.85 buffet.
